General Laws of Nature, Society, and Thought as the Philosophical Foundation of the General Systems Theory in the Methodological Approach to Cognizing the World: A Philosophical Solution to the Physical-Mathematical Theory of Strings.

By: [Geltser, Yury G.](#) • In: European Scientific e-Journal, Nov2025, issue 39, pages 202-234 (33p) • Academic Search Ultimate

Contemporary philosophy requires a reconsideration of the universal laws of being, since the classical dialectics of the 19th century, based on the ideas of infinite development and linear causality, no longer correspond to the scientific world. [Show more](#)
